## Ideal for:

**Riprap**

**Rock walls**

**Landscaping**

**Barriers**

We have a large variety of sizes and rock types. Our granite rocks come in several different colors including pink, grey, black, and a mix of many colors. We have two types of sandstone rock, one is softer and yellowish red and the other is a darker red metamorphized sandstone/quartzite that is harder and much more durable. The variety of rock colors, types, and sizes available can be used for almost any project from construction of rock walls and landscape boulders, to riprap.
